Foi o primeiro da sexta geração de consoles, precedendo o PlayStation 2 da Sony, o GameCube da Nintendo e o Xbox da Microsoft.

O Dreamcast foi o último console doméstico da Sega, marcando o fim dos 18 anos da empresa no mercado de consoles.

Devido ao valor alto do hardware do Sega Saturn, o Dreamcast foi projetado para reduzir custos usando componentes mais baratos, incluindo uma CPU SH-4 da Hitachi e uma GPU PowerVR2 da NEC.

O lançamento no Japão teve uma recepção moderada, o Dreamcast desfrutou de um lançamento bem-sucedido nos Estados Unidos, apoiado por uma grande campanha de marketing mas o interesse no sistema diminuiu constantemente à medida que a Sony construía um hype para o seu próximo lançamento de consoles, o PlayStation 2.

As vendas não atenderam às expectativas da Sega, apesar de vários cortes de preços e a empresa continuou a sofrer perdas financeiras significativas.
